Lorena,

Please touch base with the Chamber regarding the existing electrical meter / power source and provide a revised scope of work as the identified light pole will no longer serve as the power source for the musical band that will use the planter area when filled-in.

The engineer will review the plans and set up an on-site meeting to discuss the proposed work. We also need to ensure that the parking space adjacent to the planter will not be impacted in any way.

Thank you,

Nancy Bower

Lorena,

Executing a new revocable permit with the BID will not hold up the project. If approved, we will need to execute a Right of Entry permit for the work to commence but this will not cause further delays.

The most important issue right now is the engineer's site visit. We will discuss with the engineer for a timeline and circle back with you.

Nancy,

I just spoke with the Chamber. They said they would continue to assume that financial responsibility. How can we streamline this? Should we just run this project through the Chamber? We just want to pay for the improvements.

Lorena,

The San Pedro BID will be responsible for setting up the electrical meter service directly with LADWP and all electrical costs for the music in connection with the art walk. Please refer to the attached existing Revocable Permit with the San Pedro Chamber of Commerce for the First Thursdays Event. In 2008, the Chamber took over responsibility for the electrical meter used for the performance space on the plaza area of Lot 735.

As indicated earlier, the engineer will need to conduct a site visit before LADOT approves the work and executes a new revocable permit with the San Pedro BID. We will touch base with you as soon as the engineer is able to travel to San Pedro.

Lorena,

LADOT's Engineer will first need to conduct a site visit to review the area and the BID's proposal to fill in one of the planters and conduct electrical upgrades. We will need the following information before the site visit is conducted:

1. What is the use of the new concrete pad and its impacts on the accessible space next to it? 1ST THURSDAY ENTERTAINMENT FOR MONTHLY ARTWALK. NO IMPACT ON ANY PARKING SPACES.
2. What is the wiring for? TO ADD AN ELECTRICAL OUTLET FOR THE MUSIC. There appears to be another conduit running to the same spot.
3. Who is responsible for paying for the power? THE POWER UTILIZED WILL BE MINIMAL. THREE HOURS PER MONTH. I WOULD HOPE THAT THERE WOULDN'T BE ANY CHARGE FOR THIS NOMINAL USE.

If approved, we will need to execute a Right of Entry Permit prior to the commencement of any work. OK
